

## Parascript® for Revenue Cycle Management Providers

*Reduce Your Manual Data Entry Costs By 50%*  
*Your solutions power businesses. Let our technology deliver the data.*

Get stress-free  
efficiency, no upfront  
costs, and no fees with  
Parascript.

### Access to Key Data

You're tasked with increasing profits and reducing spending to deliver your Revenue Cycle Management services. And yet, the complexity involved grows greater every day. While efforts are underway to make the entire process paperless, the sheer volumes of paper continue to pose a significant challenge.

Accurate data, claim submittal, adjudicating claims and reconciliation require great effort and expense, and all rely on key data that is trapped in your documents—superbills, claim forms and EOPs. You're forced to spend precious time reviewing, capturing and entering that “trapped data” into systems in order to deliver your high quality service offerings.

Perhaps, you've built a very costly data entry staff or outsourced this to a specialist. While this may reduce the data entry headaches, you still battle slow turnaround times and poor data quality. If you have applied technology to parsing full-page OCR results, this technique only gets you so far while creating a significant technology support burden. *What if you could get access to reliable, high quality data from these documents and lower your costs without increasing technology complexity?* **This is where Parascript comes in.**

### Unparalleled Data Quality at Less Cost

Increase your data quality and significantly reduce your costs without any upfront investment. Get stress-free efficiency with no upfront costs or fees by becoming a Parascript strategic partner. Our unique software and services offering helps you drive down processing costs and gain control of chaos within the process. The result is greater efficiency, lower cost and more reliable data ensuring you deliver superior RCM solutions to your customers.

Whether your organization owns or outsources the document processing function, we can work with you and any outsourcing partner to provide significant value without disruption or replacement of existing technology. Our software-enabled services automate document classification, document separation, data extraction and data quality processes.

## REVENUE CYCLE MANAGEMENT

### USE A SINGLE PLATFORM TO PROCESS EVERYTHING

### LEVERAGE YOUR EXISTING TECHNOLOGIES

### MAINTAIN DATA QUALITY THROUGHOUT THE PARTNERSHIP

### STRATEGIC PARTNERSHIP WITH PARASCRIPT

## Benefits of Parascript Technology Solutions

Our team will work closely with you to analyze your existing data and workflows and uncover hidden savings to meet all your customized document processing needs.

We have a unique team of highly experienced engineers and scientists—over a third with PhDs and many with national and international awards in mathematics and programming—who enjoy analyzing data and excel at it.

*Use a Single Platform.* Process multiple document types with various types of data, including handwritten information common on superbills, using a single platform.

*Leverage Your Existing Technologies.* Improve what you have in place. There's no requirement to replace any existing document processing technology. Parascript scientists will work with your current technologies to protect existing investment while improving it with world-class document analysis and recognition technologies.

*Maintain Data Quality with Systems Tuned to Your Needs.* Systems are tuned to your data quality needs with accuracy guarantees at a data field level. For data that meet accuracy targets, there is no need to perform additional verification. Plus, Parascript staff will maintain data quality throughout the life of the partnership. There is no need to purchase expensive maintenance or services agreements.

*Strategic Partnership.* As a strategic partner, Parascript takes on the risks of R&D with respect to the core document and data processing technologies for your superbills, claim forms and EOPs, as part of our strategic partnership. This allows you to focus your broader solution development and marketing.
