Reduce Your Manual Data Entry Costs By 50%
Your solutions power businesses. Let our technology deliver the data.

Get stress-free efficiency and no upfront costs, no fees with the Parascript Accelerator Program.
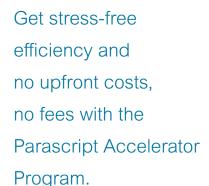

Access to Reliable, High Quality Data

You handle costly receivables, payables procurement and expense management for your clients. Your e-invoicing services help customers with this labor-intensive task, which means you deal with volumes of paper invoices, purchase orders, remittances and checks. Efforts are underway to fully digitize the payment processes, but paper invoices are still mailed and sent every day.

Document conversion can be highly challenging with varying types and layouts, and complex line item data that must be extracted into usable information. Perhaps, you've built a costly data entry staff or outsourced this to a specialist. While this may reduce the data entry headaches, you still battle slow turnaround times and poor data quality. Or perhaps, you have applied technology to parsing full-page OCR results, and this technique only gets you so far while creating a significant technology support burden.

What if you could get access to reliable, high quality data from these documents and lower your costs without increasing technology complexity? **This is where Parascript comes in.**

Unparalleled Data Quality at Less Cost

Increase your data quality and significantly reduce your costs without any upfront investment. Get stress-free efficiency with no upfront costs or fees by joining the Parascript Accelerator Program. Our unique software and services offering helps you drive down processing costs and gain control of chaos within the process.

E-INVOICING PROVIDERS & PORTALS

The result is greater efficiency, lower cost and more reliable data ensuring you deliver superior e-invoicing services to your customers.

Whether your organization owns or outsources the document processing function, we can work with you and any outsourcing partner to provide significant value without disruption or replacement of existing technology. Our software-enabled services automate document classification, document separation, data extraction and data quality processes.

Benefits of the Parascript Accelerator Program

For your customized document needs, our team will work closely with you to analyze your existing data and workflows to uncover hidden savings. We are a team of PhDs who enjoy analyzing data and who excel at it.

This is all at no cost and no obligation for select e-invoicing providers and invoice portals that qualify for the Parascript Accelerator Program.

ANALYZE DATA, WORKFLOW FOR COST SAVINGS

Analyze Existing Data and Workflows for Cost Savings. Analysis of existing data and workflows to determine cost savings potentials is performed by Parascript PhDs that have decades of experience with large-scale data processing projects—all at no cost or obligation to you.

USE A SINGLE PLATFORM TO PROCESS EVERYTHING

Use a Single Platform. Process multiple document types with various types of data, including handwritten information common on superbills, using a single platform.

LEVERAGE YOUR EXISTING TECHNOLOGIES

Leverage Your Existing Technologies. Improve what you have in place. There is no requirement to replace any existing document processing technology. Parascript scientists will work with your current technologies to protect existing investment while improving it with world-class document analysis and recognition technologies.

MAINTAIN DATA QUALITY THROUGHOUT THE PARTNERSHIP

Maintain Data Quality with Systems Tuned to Your Needs. Systems are tuned to your data quality needs with accuracy guarantees at a data field level. For data that meet the accuracy targets, there is no need to perform additional verification. In addition, Parascript staff maintain the data quality throughout the life of the partnership so purchasing expensive maintenance and services agreements are unnecessary with Parascript technology solutions.

NO NEED TO PURCHASE SOFTWARE

No Purchase Necessary. There is no need to purchase software. The technology is delivered as part of the service and efforts for customized documents are recouped from documented and guaranteed cost reductions. **We only benefit when you save.** For pre-built document types such as invoices, you pay only for what you automate. This means that you don't pay for any data element that requires human verification.
