

BUSINESS CHALLENGE

AUTOMATION OF MANUAL SYSTEMS
PROCESSING HIGH VOLUMES OF FORMS
CONTAINING DIVERSE FIELD TYPES

SOLUTION

PARASCRIPT'S UNIQUE *FORMXTRA*
ENTERPRISE SOFTWARE ENABLES
ORGANIZATIONS TO ACHIEVE IMMEDIATE
SAVINGS ON DIFFICULT-TO-PROCESS FORMS

BENEFITS & RESULTS

- REDUCED TIME, COST, AND LABOR COMMONLY ASSOCIATED WITH FORMS PROCESSING SAVING \$25,000 IN THE FIRST YEAR
- PROVIDED ALL OF THE MODULES REQUIRED TO ESTABLISH A COMPLETE FORMS PROCESSING WORKFLOW
- AUTOMATICALLY PROCESSED HIGH VOLUMES OF FORMS WITH RECOGNITION RATES OF OVER 80 PERCENT

Aurora Health Care Automates Forms Processing with Parascript's *FormXtra* Recognition Software, 80% Cost Reduction Yields Payback in First Year

Aurora Health Care is a not-for-profit health care provider and a national leader in efforts to improve health care quality. Aurora offers services at sites in more than 90 communities throughout eastern Wisconsin.

Aurora Health Care receives approximately 100,000 flu consent forms every season. The forms contain diverse field types such as voucher number, first and last names, address, date of birth, and several check boxes, among others. The company was looking for a cost-effective solution to automate the processing of these forms with optical character recognition (OCR) and handwriting capture.

"We are very pleased with the results achieved with Parascript FormXtra Enterprise. Not only were we able to automate the labor-intensive and error-prone process of recognizing and keying in information on flu consent forms, we have also seen significant savings after only a few months."

JoAnn Smith, manager of system billing for
Aurora Health Care

Aurora Health Care selected Parascript's *FormXtra* Enterprise forms processing software because of its unique ability to read handprint, machine print and cursive - or any combination of writing styles - and the cost savings advantages it offers. *FormXtra* Enterprise provides a complete forms processing workflow, and enables organizations to achieve immediate savings on otherwise difficult-to-process forms. After implementing the technology, Aurora Health Care was able to automatically process 100,000 flu consent forms with recognition rates of over 80 percent, saving \$25,000 in the first year after the initial investment.

JoAnn Smith, manager system billing for Aurora Health Care said, "We are very pleased with the results achieved with Parascript *FormXtra* Enterprise. Not only were we able to automate the labor-intensive and error-prone process of recognizing and keying in information on flu consent forms, we have also seen significant savings after only a few months."

The Entire Workflow in One Neat Package

Parascript's *FormXtra* Enterprise provides all of the modules required to establish a complete forms processing workflow. Form definition, form registration, intelligent recognition, keying module, dynamic quality control, reporting and administration tools make managing forms processing and keying jobs easy.

With *FormXtra*, customers get access to image analysis and pattern recognition technology, trusted to process over 100 billion checks, forms and mail pieces annually. Parascript's software has the highest recognition rates available in the market. The company is a recognized leader in the payment and mail automation industries with an 85% U.S. market share in check recognition. It is the sole provider of handwritten address recognition technology for the USPS. Parascript helps organizations to save over \$1 billion annually worldwide.

About Parascript

Parascript delivers the world's best Image Recognition Engine. Employing patented digital image analysis, handwriting analysis and advanced pattern recognition technologies, Parascript improves important business operations in areas like forms processing, medical imaging, postal automation, signature verification and fraud detection. The powerful Parascript engine processes over 100 billion imaged documents per year. Fortune 500 companies, postal operators, major government and financial institutions rely on Parascript products, including the U.S. Postal Service, Bell + Howell, Fiserv, Eltag, IBM, Lockheed Martin, NCR, Siemens, Xerox and Burroughs.
